

# Hawk Weisman

990 First St,  
Meadville, PA, 16335  
+1 (814) 853-1501

hi@hawkweisman.me  
<http://hawkweisman.me>

**EDUCATION**     *Bachelor of Science* in Applied Computing (Software Engineering)  
Allegheny College, Meadville, PA  
Degree expected: May 2016  
GPA: 3.67

## Relevant Coursework

Data Structures and Algorithms	Computer Organization
Principles of Software Engineering	Operating Systems
Principles of Data Management	Introduction to Compiler Design
Programming Language Implementation	Robotics and Multi-Agent Systems
Visual Computing	

## SKILLS

<i>Proficient with</i>	Scala, Rust, Java, Python
<i>Capable with</i>	C, R, Lisp, SQL, HTML/CSS
<i>Familiar with</i>	Haskell, Go, CoffeeScript, JavaScript
<i>Web Frameworks</i>	Scalatra, Bootstrap, Slick, JQuery
<i>Build and CI</i>	Gradle, Ant, sbt, Make, Cargo, Travis, Jenkins
<i>Testing</i>	ScalaTest, ScalaCheck, JUnit, Mockito
<i>IDEs/Editors</i>	Atom, SublimeText, IntelliJ IDEA, Eclipse
<i>Source Control</i>	Git, GitHub, GitLab

## WORK EXPERIENCE

*Lead Software Engineer*     Spring 2014 — Ongoing  
MeteorCode Laboratories, Meadville, PA

- Co-founded a small business to develop and publish independently-developed computer games.
- Developed a game engine in Scala and Java, contributing a majority of source code to the project.
- Set up and maintained a development environment using GitLab, Jenkins CI, and Gradle.
- Contributed to the design and development of a Web site, meteorcode.com, using HTML/CSS, SASS/SCSS, and Polymer.

## SELECTED PROJECTS

*Seax*     Spring 2015 — Ongoing  
Personal Project  
<http://hawkweisman.me/seax>

- Designed and developed a runtime environment for functional programming languages.
- Implemented a virtual machine, Scheme compiler, and other utilities in Rust.
- Wrote over 3,500 lines of Rust code and over 3,000 lines of documentation.

*Decaf Compiler*     Fall 2014  
CMPSC420: Introduction to Compiler Design, Allegheny College  
<https://hawkweisman.me/decaf>

- Worked on a team to develop a compiler for a small Java-like language.
- Contributed a majority of Scala source code
- Wrote unit tests using ScalaTest
- Developed parsing, semantic analysis, and Javabyte code generation components

*DeeBee*

Fall 2014

CMPSC380: Principles of Data Management, Allegheny College

<https://github.com/hawkw/deebree>

- Independently developed a small SQL database for educational purposes
- Developed an architecture for a relational database implementation
- Wrote over 1,700 lines of Scala code
- Wrote unit tests using ScalaTest

*Pathway Game Engine*

Spring 2014 — Ongoing

MeteorCode Laboratories

<https://github.com/MeteorCode/Pathway>

- Developed an open-source event driven game engine for the JVM platform.
- Implemented features such as file I/O, event system, and scripting systems.
- Contributed over 9,000 lines of Java and Scala source code.
- Designed an extensible architecture for a software development framework.
- Wrote a comprehensive test fixture using tools such as JUnit, Mockito, and JCoCo.

*Remote Collab SublimeText Plugin*

Spring 2014

CMPSC440: Principles of Operating Systems, Allegheny College

<https://github.com/TeamRemote/remot-sublime>

- Developed an open-source SublimeText plugin to facilitate remote pair programming.
- Contributed over 1,000 lines of Python source code.

*Filesystem Traversal Study*

Spring 2014

CMPSC440: Principles of Operating Systems, Allegheny College

<https://github.com/hawkw/traverse>

- Independently organized a research project to collect and analyze filesystem data.
- Programmed data-collection tools in Python.
- Prepared an IPython notebook to analyze and visualize data.
- Encouraged other students to voluntarily contribute datasets.
